

Project Problem Description

Warning: This is subject to change!

Note:

(A): do not include UI within this user stories

(B): Need to include business value – to help distinguish important from frivolous stories.

You are to design and implement a simple, attractive, and easy-to-use Android application to satisfy the following goals.

We want a mobile application that can allow people from around the world to generate connections in form of romance, friendship and other ways.

User Profile

As a user, I want a profile with a username, Location, an About, Interest and Gallery section.

As a user, I want to edit my personal information (About, Interest, Gallery) section in my profile.

As a user, I want to retrieve and show the profile of a presented username.

As a user, I want to be able to upload a story video

Discover Page (Main Screen)

As a user, I want to apply customized filters.

As a user, I want to see profile matches based on customized filters.

As a user, I want to swipe on photos.

As a user, I want to like and star photos.

Matches

As a user I want to see list of my matches.

As a user I want to unmatch someone from my list of matches.

Messages

As a user, I want to be able to send messages to my matches.

As a user, I want to be able to reply to messages sent by matches.

Searching

As a user, I want to specify a keyword and search for all my matches.

As a user, I want to specify a keyword and search through my messages.

Activities

As a user, I want to see my matches stories.

As a user, I want to reply to matches stories.
